25 May 68

SUBJECT: Conference Agenda - Ad Hoc Life Sciences Coordinating Group ORD - OSA

TO: Participants

A. Current Status of OSA Operational Activities.

1. Plans for retrenchment of Oxcart and disposition of existing resources.
2. Status report on Edwards North Base activities, including aeromedical support augmentation during ensuing 6 months training period.
3. Collateral aeromedical activities with similar Air Force Special Operational Units.

B. Resume of Lovelace-OSA - AF Aeromedical Conference, February 1968.

1. Positive actions currently being taken.
2. Items discussed without resolution of divergent opinion and initiation of action.
3. Plans for follow-on conference at Lovelace Clinic during late July 68.

C. Status of AE&S orientation and integration with operational units.

1. At stateside and overseas bases; some progress but 'selling-job' still remains.

D. Questions and Problem areas of mutual interest between ORD and OSA.

1. Standardization of procedures and data handling for all aeromedical, psychological and life support data.
2. Establishment of dynamic individual crew members 'project life history'.
3. Experimental efforts to establish a valid, objective performance index and relative rating on key operational personnel.

Page 2

4. Treatment and disposition of aeromedical/psychological/life support data from Oxcart project before records become unavailable.

5. Current status of human stress research in DOD, NASA and FAA of interest to OSA. Question of applicability to operational programs; consideration (again) of the value to be realized from in-flight physiological monitoring.

6. Report on current historical accounts being prepared within OSA; need for Life Sciences R & D inputs?

7. Opportunities for further collaborative projects between ORD and OSA.
